

The true fund accounting™ software of choice.

A purpose-driven finance and HR solution that supports your growth.

Deploy in the cloud

Deploy on-premises

We empower cause-focused organizations to confidently manage the financial and personnel complexities they face each and every day. A market-leading technology solution, MIP Fund Accounting® equips these organizations to:

- Track and manage growth across diverse revenue sources
- Develop a financial roadmap and manage costs
- Streamline finance, payroll and HR processes
- Ensure financial integrity and compliance
- Provide transparency to stakeholders to support informed decision making

↔ The power of choice

Choose either cloud or on-premises deployment.

Support a variety of integration needs with Product Partners.

Receive ongoing assistance from authorized business partners and experts.

Select from affordable subscription or perpetual license options.

With MIP® you can:

Grow confidently

Efficiently manage current financials and remain poised for new opportunities ahead.

Streamline processes

Fully integrated payroll and HR management tools eliminate inefficient manual and/or outsourced processes.

Adapt to change

Overcome challenges, adjust your approach and manage strategic risk.

Empower employees

Offer a self-service web portal with time tracking, payroll history, benefit enrollment, biographical updates, and more to replace paper tracking and siloed systems.

Tell your financial story

Communicate key performance indicators (KPIs) and insightful financial metrics to your board and other key stakeholders.

Remain prepared

Face audit preparation head-on with MIP®'s detailed audit trail, produce FASB and GASB compliant financial statements and enforce internal controls.

The true fund accounting™ software of choice

MIP® was built exclusively with and for nonprofit and government organizations. It provides a user-centered experience that supports the desired processes of finance and HR professionals, without compromise. Our market-leading technology provides you with the choice of cloud or on-premises deployments, and the ability to easily move between them, based on your organization's ever-changing needs.
